

Kot Bhalwal, Jammu

Model Institute of Engineering  
& Technology (Autonomous)  
Dr. Arun K. Gupta Teaching-Learning Centre

## Department of Electronics and Communication Engineering

### Details of Lesson Plan

S.No.	Particulars	Details
1.	Course Name	Engineering Physics
2.	Course Code	BSC-101
3.	Academic Year	2024-25
4.	Semester	1 <sup>st</sup>
5.	Number of Lesson plans	56
6.	Faculty Assigned	Prof. Rajinder Sharma

Faculty Signature

<b>Lesson Plan No. 1</b>	<b>Course Name: Engineering Physics</b> <b>Topic: Introduction to vectors</b>	<b>Course No.: BSC-102</b>
--------------------------	--	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: <ol style="list-style-type: none"> <li>articulate the concept of vectors and scalar quantities</li> <li>illustrate different vector and scalar operations with examples</li> <li>applications of various mathematical operations</li> </ol>
<b>Teaching Aids (if any)</b>	<ol style="list-style-type: none"> <li>Power point presentation</li> <li>Chalk &amp; talk</li> <li>Use of Google quiz assignment tool for online quiz</li> </ol>
<b>Teaching Development</b>	<ol style="list-style-type: none"> <li><b>Introduction</b> (5 minutes)           <ul style="list-style-type: none"> <li>Ask questions</li> <li>Why we learn vector operations</li> <li>Difference between scalar and vector quantities</li> <li>Highlight the importance of vector differentiation</li> </ul> </li> <li><b>Development</b> (30 minutes)           <ol style="list-style-type: none"> <li>Scalar and vector quantities with examples</li> <li>Representation of vectors</li> <li>Types of vectors               <ul style="list-style-type: none"> <li>-Equal vectors</li> <li>-Negative vector</li> <li>-Null vector</li> <li>-Unit vector</li> </ul> </li> <li>Position vector</li> <li>Product of vectors               <ul style="list-style-type: none"> <li>- Scalar product and cross product</li> <li>- Scalar triple product</li> </ul> </li> <li>Applications of vector products</li> </ol> </li> <li>Exercise (5 minutes) – Use Google forms for quiz based on the topic</li> </ol>
<b>Closure</b>	<ol style="list-style-type: none"> <li>Summarize the Lesson Learning Outcomes and get affirmation from students on these.</li> <li>Suggested Reading  <a href="https://nptel.ac.in/courses/103102024">https://nptel.ac.in/courses/103102024</a>  <a href="https://www.youtube.com/watch?v=h9Ih8atdxcw">https://www.youtube.com/watch?v=h9Ih8atdxcw</a> </li> <li>Homework Basic problems on mathematical operations taught in class</li> </ol> <p>Spend 5 minutes to wrap up and consolidate the learnings</p>
<b>Evaluation</b>	<ol style="list-style-type: none"> <li>Reflective Questions (What, Why, Who?). Allow students to answer and discuss.</li> </ol>

	<p>2. Google assignment Quiz on scalar product, vector product, etc review.</p> <p>Spend 5 minutes to evaluate student assimilation of the lesson contents</p>
--	--

<b>Lesson Plan No. 2</b>	<b>Course Name: Engineering Physics Topic: Concepts of Del operator, partial derivative, and fields (scalar and vector).</b>	<b>Course No.: BSC-102</b>
--------------------------	--	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: <ol style="list-style-type: none"> <li>Understand the fundamental concept of the Del operator (<math>\nabla</math>) and its application in vector calculus.</li> <li>Grasp the concept of partial derivatives and their significance in multivariable calculus.</li> <li>Differentiate between scalar fields and vector fields and comprehend their respective characteristics.</li> <li>Relate the concepts of Del operator, partial derivative, and fields to real-world phenomena and scientific applications.</li> </ol>
<b>Teaching Aids (if any)</b>	<ol style="list-style-type: none"> <li>Power point presentation</li> <li>Chalk &amp; talk</li> <li>Use of Google quiz assignment tool for online quiz</li> </ol>
<b>Teaching Development</b>	<ol style="list-style-type: none"> <li><b>Introduction</b> (5 minutes)           <ul style="list-style-type: none"> <li>Ask questions</li> <li>Define the Del operator (<math>\nabla</math>) and its role in vector calculus.</li> <li>Explain the concept of partial derivatives and their notation.</li> </ul> </li> <li><b>Development</b> (30 minutes)           <ol style="list-style-type: none"> <li><b>Del Operator and Partial Derivatives:</b> <ul style="list-style-type: none"> <li>Illustrate the Del operator (<math>\nabla</math>) in Cartesian and other coordinate systems.</li> <li>Demonstrate the calculation of partial derivatives using examples.</li> <li>Emphasize the geometric interpretation of partial derivatives.</li> </ul> </li> <li><b>Scalar and Vector Fields:</b> <ul style="list-style-type: none"> <li>Define scalar and vector fields and provide examples (e.g., temperature distribution for scalar field, velocity field for vector field).</li> <li>Discuss the properties and behavior of scalar and vector fields.</li> <li>Highlight the divergence and curl operations in vector fields.</li> </ul> </li> <li><b>Real-world Applications:</b> <ul style="list-style-type: none"> <li>Showcase practical applications of Del operator, partial derivatives, scalar, and vector fields in physics, engineering, and other disciplines.</li> <li>Engage students in discussions about how these concepts are utilized in various scientific contexts.</li> </ul> </li> </ol> </li> </ol>

	<p>3. Exercise (5 minutes) – Use Google forms for quiz based on the topic</p>
<b>Closure</b>	<ol style="list-style-type: none"><li>1. Summarize the Lesson Learning Outcomes and get affirmation from students on these.</li><li>2. Suggested Reading <a href="https://nptel.ac.in/courses/103102024">https://nptel.ac.in/courses/103102024</a> <a href="https://www.youtube.com/watch?v=h9Ih8atdxcw">https://www.youtube.com/watch?v=h9Ih8atdxcw</a></li><li>3. Homework Basic problems on mathematical operations taught in class</li></ol> <p>Spend 5 minutes to wrap up and consolidate the learnings</p>
<b>Evaluation</b>	<ol style="list-style-type: none"><li>1. Reflective Questions (What, Why, Who?). Allow students to answer and discuss.</li><li>2. Google assignment Quiz on Del operator, partial derivative, and fields.</li></ol> <p>Spend 5 minutes to evaluate student assimilation of the lesson contents</p>

<b>Lesson Plan No. 3</b>	<b>Course Name: Engineering Physics</b> <b>Topic: Gradient of scalar field and physical significance</b>	<b>Course No.: BSC-102</b>
--------------------------	---	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: <ol style="list-style-type: none"> <li>articulate the concept of Physical meaning of gradient of a scalar field</li> <li>illustrate difference between the scalar and vector quantity obtained on applying del operator</li> </ol> applications of gradient of a scalar field
<b>Teaching Aids (if any)</b>	<ol style="list-style-type: none"> <li>Power point presentation</li> <li>Chalk and talk</li> <li>Use of Google quiz assignment tool for online quiz</li> </ol>
<b>Teaching Development</b>	<ol style="list-style-type: none"> <li><b>Introduction</b> (5 minutes)           <ul style="list-style-type: none"> <li>Ask questions</li> <li>Why we learn operations</li> <li>Difference between scalar and vector operators</li> <li>Highlight the importance of gradient of scalar field</li> </ul> </li> <li><b>Development</b> (30 minutes)           <ol style="list-style-type: none"> <li>Gradient of a scalar field</li> <li>Physical meaning of gradient</li> <li>Numerical problems based on gradient</li> <li>Applications of gradient</li> </ol> </li> <li>Exercise (5 minutes) – Use Google forms and Nearpod tool for quiz based on the topic Use Nearpod to collect responses and discuss the answers.</li> </ol>
<b>Closure</b>	<ol style="list-style-type: none"> <li>Summarize the Lesson Learning Outcomes and get affirmation from students on these.</li> <li>Suggested Reading  <a href="https://nptel.ac.in/courses/122101002">https://nptel.ac.in/courses/122101002</a>  <a href="https://www.youtube.com/watch?v=NED2Cl8u9Q0">https://www.youtube.com/watch?v=NED2Cl8u9Q0</a>            Homework            Basic problems on gradient taught in class            Spend 5 minutes to wrap up and consolidate the learnings</li> </ol>
<b>Evaluation</b>	<ol style="list-style-type: none"> <li>Reflective Questions (What, Why, Who?). Allow students to answer and discuss.</li> <li>Google Assignment Quiz on gradient, its physical significance and numerical problems</li> </ol>

# Model Institute of Engineering & Technology (Autonomous) Lesson Plan

Kot, Bhalwal, Jammu

	Spend 5 minutes to evaluate student assimilation of the lesson contents
--	---

<b>Lesson Plan No. 4</b>	<b>Course Name: Engineering Physics</b> <b>Topic: Divergence of vector and its expression in term of cartesian coordinates.</b>	<b>Course No.: BSC-102</b>
--------------------------	--	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: a. articulate the concept of divergence of a vector field b. illustrate the concept of solenoidal field applications of divergence to various fields
<b>Teaching Aids (if any)</b>	a. Power point presentation b. Talk and chalk c. Use of Google quiz assignment tool for online quiz
<b>Teaching Development</b>	1. <b>Introduction</b> (5 minutes) - Ask questions Why we learn operations - Difference between scalar and vector operators - Highlight the importance of divergence of a vector field 2. <b>Development</b> (30 minutes) a. Divergence of vector field b. Physical meaning of divergence c. Numerical problems based on divergence d. Applications of divergence 3. Exercise (5 minutes) – Use Google forms and Nearpod tool for quiz based on the topic Use Nearpod to collect responses and discuss the answers.
<b>Closure</b>	1. Summarize the Lesson Learning Outcomes and get affirmation from students on these. 2. Suggested Reading <a href="https://nptel.ac.in/courses/122101002_">https://nptel.ac.in/courses/122101002_</a> <a href="https://web.iitd.ac.in/~pmvs/courses/mcl704/BVC.pdf">https://web.iitd.ac.in/~pmvs/courses/mcl704/BVC.pdf</a> <a href="https://ocw.mit.edu/courses/res-tll-004-stem-concept-videos-fall-2013/94c6fc5f25af9e74e87a9a460657a76a_MITRES_TLL-004F13_Curl_IG.pdf">https://ocw.mit.edu/courses/res-tll-004-stem-concept-videos-fall-2013/94c6fc5f25af9e74e87a9a460657a76a_MITRES_TLL-004F13_Curl_IG.pdf</a> Homework Basic problems on divergence taught in class Spend 5 minutes to wrap up and consolidate the learnings
<b>Evaluation</b>	1. Reflective Questions (What, Why, Who?). Allow students to answer and discuss.

	<p>2. Google Assignment Quiz on divergence, its physical significance and numerical problems</p> <p>Spend 5 minutes to evaluate student assimilation of the lesson contents</p>
--	---

<b>Lesson Plan No. 5</b>	<b>Course Name: Engineering Physics</b> <b>Topic: Numerical problems based on divergence.</b>	<b>Course No.: BSC-102</b>
--------------------------	--	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: <ol style="list-style-type: none"> <li>To understand the concept of divergence in vector calculus.</li> <li>To solve numerical problems involving divergence to analyze the behavior of vector fields.</li> <li>To apply divergence theorem in various scenarios for solving practical problems.</li> </ol>
<b>Teaching Aids (if any)</b>	<ol style="list-style-type: none"> <li>Power point presentation</li> <li>Talk and chalk</li> <li>Use of Google quiz assignment tool for online quiz</li> </ol>
<b>Teaching Development</b>	<ol style="list-style-type: none"> <li><b>Introduction</b> (5 minutes)           <ul style="list-style-type: none"> <li>Ask questions</li> <li>Define divergence and explain its significance in vector calculus.</li> </ul> </li> <li><b>Development</b> (30 minutes)           <ol style="list-style-type: none"> <li>Illustrative examples: Work through numerical problems step by step, demonstrating the application of divergence in different contexts.</li> <li>Guided practice: Engage students in solving problems collaboratively, providing guidance and feedback as needed.</li> <li>Independent practice: Assign numerical problems for students to solve individually or in small groups to reinforce learning.</li> <li>Application exercises: Present real-world scenarios where understanding divergence is crucial, encouraging students to apply their knowledge creatively.</li> <li>Discussion and review: Encourage students to discuss their approaches and solutions, addressing any misconceptions and reinforcing key concepts.</li> </ol> </li> <li>Exercise (5 minutes) –           <ul style="list-style-type: none"> <li>Use Google forms and Nearpod tool for quiz based on the topic</li> <li>Use Nearpod to collect responses and discuss the answers.</li> </ul> </li> </ol>
<b>Closure</b>	<ol style="list-style-type: none"> <li>Summarize the Lesson Learning Outcomes and get affirmation from students on these.</li> <li>Suggested Reading           <ul style="list-style-type: none"> <li><a href="https://nptel.ac.in/courses/122101002_">https://nptel.ac.in/courses/122101002_</a></li> <li><a href="https://web.iitd.ac.in/~pmvs/courses/mcl704/BVC.pdf">https://web.iitd.ac.in/~pmvs/courses/mcl704/BVC.pdf</a></li> <li><a href="https://ocw.mit.edu/courses/res-tll-004-stem-concept-videos-fall-">https://ocw.mit.edu/courses/res-tll-004-stem-concept-videos-fall-</a></li> </ul> </li> </ol>

	<p><a href="https://www.curl.com/94c6fc5f25af9e74e87a9a460657a76a">2013/94c6fc5f25af9e74e87a9a460657a76a MITRES TLL-004F13_Curl_IG.pdf</a></p> <p>Homework Basic problems on divergence taught in class Spend 5 minutes to wrap up and consolidate the learnings</p>
<b>Evaluation</b>	<ol style="list-style-type: none"><li>1. Reflective Questions (What, Why, Who?). Allow students to answer and discuss.</li><li>2. Google Assignment Quiz on divergence, its physical significance and numerical problems</li></ol> <p>Spend 5 minutes to evaluate student assimilation of the lesson contents</p>

<b>Lesson Plan No. 6</b>	<b>Course Name: Engineering Physics</b> <b>Topic: Curl of vector and physical interpretation</b>	<b>Course No.: BSC-102</b>
--------------------------	---	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: a. articulate the concept of curl of vector field b. illustrate difference between dot and cross product operators applications of curl of vector field
<b>Teaching Aids (if any)</b>	a. Power point presentation b. Chalk & talk c. Use of Google quiz assignment tool for online quiz
<b>Teaching Development</b>	1. <b>Introduction</b> (5 minutes) - Ask questions Why we learn operations - Definition of curl operator - Highlight the importance of Curl of vector field 2. <b>Development</b> (30 minutes) a. Curl of vector field b. Physical meaning of curl c. Numerical problems based on curl d. Applications of curl 3. Exercise (5 minutes) – Use Google forms and Nearpod tool for quiz based on the topic Use Nearpod to collect responses and discuss the answers.
<b>Closure</b>	1. Summarize the Lesson Learning Outcomes and get affirmation from students on these. 2. Suggested Reading <a href="https://nptel.ac.in/courses/122101002">https://nptel.ac.in/courses/122101002</a> <a href="https://www.youtube.com/watch?v=NED2Cl8u9Q0">https://www.youtube.com/watch?v=NED2Cl8u9Q0</a> 3. Homework Basic problems on gradient taught in class Spend 5 minutes to wrap up and consolidate the learnings
<b>Evaluation</b>	1. Reflective Questions (What, Why, Who?). Allow students to answer and discuss. 2. Google Assignment Quiz on Curl of a vector  Spend 5 minutes to evaluate student assimilation of the lesson contents

# Model Institute of Engineering & Technology (Autonomous) Lesson Plan

Kot, Bhalwal, Jammu

<b>Lesson Plan No. 7</b>	<b>Course Name: Engineering Physics</b> <b>Topic: Numerical problems based on</b> <b>Curl of Vector</b>	<b>Course No.: BSC-102</b>
--------------------------	---	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: <ol style="list-style-type: none"> <li>Understand the concept of curl of a vector in three-dimensional space.</li> <li>Develop the ability to calculate the curl of a vector function using various methods.</li> <li>Apply the concept of curl to solve numerical problems in physics and engineering.</li> <li>Enhance problem-solving skills through the application of vector calculus.</li> </ol>
<b>Teaching Aids (if any)</b>	<ol style="list-style-type: none"> <li>Power point presentation</li> <li>Chalk &amp; talk</li> <li>Use of Google quiz assignment tool for online quiz</li> </ol>
<b>Teaching Development</b>	<ol style="list-style-type: none"> <li><b>Introduction</b> (5 minutes)           <ul style="list-style-type: none"> <li>Ask questions</li> <li>Define curl as a measure of rotation within a vector field and explain its significance in physics and engineering.</li> </ul> </li> <li><b>Development</b> (30 minutes)           <ol style="list-style-type: none"> <li><b>Mathematical representation:</b> Introduce the mathematical definition of curl in terms of partial derivatives and explain its geometric interpretation.</li> <li><b>Calculation methods:</b> Present various methods for calculating the curl of a vector field, including the determinant method and the cross-product method.</li> <li><b>Application of curl:</b> Illustrate how curl is applied in real-world problems, such as fluid dynamics, electromagnetism, and mechanical engineering.</li> <li><b>Guided practice:</b> Work through a series of numerical problems involving the computation of curl, providing step-by-step guidance and explanations.</li> <li><b>Independent practice:</b> Assign additional problems for students to solve individually or in groups, encouraging critical thinking and application of learned concepts.</li> </ol> </li> <li><b>Exercise</b> (5 minutes) – Use Google forms and Nearpod tool for quiz based on the topic Use Nearpod to collect responses and discuss the answers.</li> </ol>
<b>Closure</b>	<ol style="list-style-type: none"> <li>Summarize the Lesson Learning Outcomes and get affirmation from students on these.</li> <li><b>Suggested Reading</b></li> </ol>

	<p><a href="https://nptel.ac.in/courses/122101002">https://nptel.ac.in/courses/122101002</a> <a href="https://www.youtube.com/watch?v=NED2Cl8u9Q0">https://www.youtube.com/watch?v=NED2Cl8u9Q0</a></p> <p>3. Homework Basic problems on gradient taught in class Spend 5 minutes to wrap up and consolidate the learnings</p>
<b>Evaluation</b>	<p>1. Reflective Questions (What, Why, Who?). Allow students to answer and discuss. 2. Google Assignment Quiz on Curl of a vector</p> <p>Spend 5 minutes to evaluate student assimilation of the lesson contents</p>

<b>Lesson Plan No. 8</b>	<b>Course Name: Engineering Physics</b> <b>Topic: Gauss's divergence theorem</b> <b>(proof)</b>	<b>Course No.: BSC-102</b>
--------------------------	---	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: <ol style="list-style-type: none"> <li>articulate the concept of divergence theorem</li> <li>illustrate the concept of solenoidal field</li> <li>applications of divergence to various fields</li> </ol>
<b>Teaching Aids (if any)</b>	<ol style="list-style-type: none"> <li>Power point presentation</li> <li>Talk and chalk</li> <li>Use of Google quiz assignment tool for online quiz</li> </ol>
<b>Teaching Development</b>	<ol style="list-style-type: none"> <li><b>Introduction (5 minutes)</b> <ul style="list-style-type: none"> <li>Ask questions</li> <li>Why we learn operations</li> <li>Difference between existence of source and sink in a field</li> <li>Highlight the importance of divergence theorem</li> </ul> </li> <li><b>Development (30 minutes)</b> <ol style="list-style-type: none"> <li>Divergence of vector field</li> <li>Physical meaning of divergence</li> <li>Numerical problems based on divergence</li> <li>Applications of divergence</li> </ol> </li> <li>Exercise (5 minutes) –           <ul style="list-style-type: none"> <li>Use Google forms and Nearpod tool for quiz based on the topic</li> <li>Use Nearpod to collect responses and discuss the answers.</li> </ul> </li> </ol>
<b>Closure</b>	<ol style="list-style-type: none"> <li>Summarize the Lesson Learning Outcomes and get affirmation from students on these.</li> <li>Suggested Reading  <a href="https://math.mit.edu/~mckernan/Teaching/12-13/Autumn/18.02/l_31.pdf">https://math.mit.edu/~mckernan/Teaching/12-13/Autumn/18.02/l_31.pdf</a>  <a href="https://www.youtube.com/watch?v=1qLb0B40YnA">https://www.youtube.com/watch?v=1qLb0B40YnA</a>            Homework            Basic problems on divergence taught in class            Spend 5 minutes to wrap up and consolidate the learnings</li> </ol>
<b>Evaluation</b>	<ol style="list-style-type: none"> <li>Reflective Questions (What, Why, Who?). Allow students to answer and discuss.</li> <li>Google Assignment Quiz on divergence, its physical significance and numerical problems</li> </ol> <p>Spend 5 minutes to evaluate student assimilation of the lesson contents</p>

<b>Lesson Plan No. 9</b>	<b>Course Name: Engineering Physics</b> <b>Topic: Stoke's theorem (proof)</b>	<b>Course No.: BSC-102</b>
--------------------------	--	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: <ul style="list-style-type: none"> <li>a. articulate the concept of Stokes theorem</li> <li>b. illustrate the concept of various types of integrals</li> <li>c. applications of Stokes theorem to various fields</li> </ul>
<b>Teaching Aids (if any)</b>	<ul style="list-style-type: none"> <li>a. Power point presentation</li> <li>b. Talk and chalk</li> <li>c. Use of Google quiz assignment tool for online quiz</li> </ul>
<b>Teaching Development</b>	<ol style="list-style-type: none"> <li>1. <b>Introduction</b> (5 minutes) <ul style="list-style-type: none"> <li>- Ask questions</li> <li>Why we learn operations</li> <li>- Difference between line, surface and volume integrals</li> <li>- Highlight the importance surface and volume integrals</li> </ul> </li> <li>2. <b>Development</b> (30 minutes) <ul style="list-style-type: none"> <li>a. Divergence of vector field</li> <li>b. Physical meaning of divergence</li> <li>c. Numerical problems based on Stokes theorem</li> <li>d. Applications of Stokes theorem</li> </ul> </li> <li>3. Exercise (5 minutes) – Use Google forms and Nearpod tool for quiz based on the topic Use Nearpod to collect responses and discuss the answers.</li> </ol>
<b>Closure</b>	<ol style="list-style-type: none"> <li>1. Summarize the Lesson Learning Outcomes and get affirmation from students on these.</li> <li>2. <b>Lesson Plan No.</b> 20	<b>Course Name: Engineering Physics</b> <b>Topic: Solution of electromagnetic waves</b>	<b>Course No.: BSC-102</b>
------------------------------	--	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: a. Derivation of solution of electromagnetic wave equation
<b>Teaching Aids (if any)</b>	a. Power point presentation b. Chalk & talk c. Use of Google quiz assignment tool for online quiz
<b>Teaching Development</b>	1. <b>Introduction</b> (5 minutes) - Ask questions Why we learn wave equation for electric field Why we learn wave equation for magnetic field - Highlight the importance of wave equations 2. <b>Development</b> (30 minutes) a. Derivation of wave equation for electric and magnetic fields b. Derivation of solution for wave equation c. Deduce the relationship between the magnitude of electric and magnetic field vectors 3. <b>Exercise</b> (5 minutes) – Use Google forms and Nearpod tool for quiz based on the topic Use Nearpod to collect responses and discuss the answers.
<b>Closure</b>	1. Summarize the Lesson Learning Outcomes and get affirmation from students on these. 2. Suggested Reading - Electromagnetic wave equation _  <a href="https://web.mit.edu/8.02t/www/802TEAL3D/visualizations/coursenotes/modules/guide13.pdf">https://web.mit.edu/8.02t/www/802TEAL3D/visualizations/coursenotes/modules/guide13.pdf</a> <a href="http://pcwww.liv.ac.uk/~awolski/Teaching/Liverpool/PHYS370/AdvancedElectromagnetism-Part2.pdf">http://pcwww.liv.ac.uk/~awolski/Teaching/Liverpool/PHYS370/AdvancedElectromagnetism-Part2.pdf</a> - Homework Basic problem on Solution of wave equation taught in class Spend 5 minutes to wrap up and consolidate the learnings
<b>Evaluation</b>	1. Reflective Questions (What, Why, Who?). Allow students to answer and discuss. 2. Google Assignment Quiz on solution of wave equation  Spend 5 minutes to evaluate student assimilation of the lesson contents

<b>Lesson Plan No.</b> 21	<b>Course Name: Engineering Physics</b> <b>Topic: Inadequacies of classical mechanics</b>	<b>Course No.: BSC-102</b>
------------------------------	--	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: a. articulate the Inadequacies of Classical Mechanics
<b>Teaching Aids (if any)</b>	a. Power point presentation b. Chalk & talk c. Use of Google quiz assignment tool for online quiz
<b>Teaching Development</b>	1. <b>Introduction</b> (5 minutes) - Ask questions Why we learn about Quantum mechanics - Need to study Inadequacies of Classical Mechanics 2. <b>Development</b> (30 minutes) a. Inadequacies of Classical Mechanics  3. Exercise (5 minutes) – Use Google forms and Nearpod tool for quiz based on the topic Use Nearpod to collect responses and discuss the answers.
<b>Closure</b>	1. Summarize the Lesson Learning Outcomes and get affirmation from students on these. 2. Suggested Reading 3. De-Broglie's concept of matter waves - <a href="https://www.khanacademy.org/science/physics/quantum-physics">https://www.khanacademy.org/science/physics/quantum-physics</a> Homework Basic problems on numerical taught in class Spend 5 minutes to wrap up and consolidate the learnings
<b>Evaluation</b>	1. Reflective Questions (What, why, Who?). Allow students to answer and discuss. 2. Google Assignment Quiz on the Inadequacies of Classical Mechanics  Spend 5 minutes to evaluate student assimilation of the lesson contents

<b>Lesson Plan No.</b> 22	<b>Course Name: Engineering Physics</b> <b>Topic: de-Broglie's concept of matter waves and de-Broglie wavelength-(a)</b>	<b>Course No.: BSC-102</b>
------------------------------	---	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: a. de-Broglie's concept of matter waves b. applications of De-Broglie's concept of matter waves
<b>Teaching Aids (if any)</b>	a. Power point presentation b. Chalk & talk c. Use of Google quiz assignment tool for online quiz
<b>Teaching Development</b>	1. <b>Introduction</b> (5 minutes) - Ask questions Why we learn about Quantum mechanics - Highlight the importance of De-Broglie's concept of matter waves 2. <b>Development</b> (30 minutes) a. De-Broglie's concept of matter waves b. Experimental proof - Davisson & Germer Experiment d. Numerical problems 3. Exercise (5 minutes) – Use Google forms and Nearpod tool for quiz based on the topic Use Nearpod to collect responses and discuss the answers.
<b>Closure</b>	1. Summarize the Lesson Learning Outcomes and get affirmation from students on these. 2. Suggested Reading 3. De-Broglie's concept of matter waves <a href="https://www.khanacademy.org/science/physics/quantum-physics">https://www.khanacademy.org/science/physics/quantum-physics</a> - <a href="https://www.britannica.com/science/de-Broglie-wave">https://www.britannica.com/science/de-Broglie-wave</a> Homework Basic problems on numerical taught in class Spend 5 minutes to wrap up and consolidate the learnings
<b>Evaluation</b>	1. Reflective Questions (What, Why, Who?). Allow students to answer and discuss. 2. Google Assignment Quiz on De-Broglie's concept of matter waves Spend 5 minutes to evaluate student assimilation of the lesson contents

<b>Lesson Plan No.</b> 23	<b>Course Name: Engineering Physics</b> <b>Topic: de-Broglie's concept of matter waves and de-Broglie wavelength-(b)</b>	<b>Course No.: BSC-102</b>
------------------------------	---	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: a. de-Broglie's concept of matter waves b. applications of De-Broglie's concept of matter waves
<b>Teaching Aids (if any)</b>	a. Power point presentation b. Chalk & talk c. Use of Google quiz assignment tool for online quiz
<b>Teaching Development</b>	1. <b>Introduction</b> (5 minutes) - Ask questions Why we learn about Quantum mechanics - Highlight the importance of De-Broglie's concept of matter waves 2. <b>Development</b> (30 minutes) a. De-Broglie's concept of matter waves b. Experimental proof - Davisson & Germer Experiment d. Numerical problems 3. Exercise (5 minutes) – Use Google forms and Nearpod tool for quiz based on the topic Use Nearpod to collect responses and discuss the answers.
<b>Closure</b>	1. Summarize the Lesson Learning Outcomes and get affirmation from students on these. 2. Suggested Reading 3. De-Broglie's concept of matter waves <a href="https://www.khanacademy.org/science/physics/quantum-physics">https://www.khanacademy.org/science/physics/quantum-physics</a> - <a href="https://www.britannica.com/science/de-Broglie-wave">https://www.britannica.com/science/de-Broglie-wave</a> Homework Basic problems on numerical taught in class Spend 5 minutes to wrap up and consolidate the learnings
<b>Evaluation</b>	1. Reflective Questions (What, Why, Who?). Allow students to answer and discuss. 2. Google Assignment Quiz on De-Broglie's concept of matter waves Spend 5 minutes to evaluate student assimilation of the lesson contents

<b>Lesson Plan No.</b> 24	<b>Course Name: Engineering Physics</b> <b>Topic: Wave-packet</b>	<b>Course No.: BSC-102</b>
------------------------------	--	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: a. articulate the concept of wave packet b. applications of wave packet
<b>Teaching Aids (if any)</b>	a. Power point presentation b. Chalk & talk c. Use of Google quiz assignment tool for online quiz d.
<b>Teaching Development</b>	1. <b>Introduction</b> (5 minutes) - Ask questions Why we learn about Quantum mechanics - Need to study wave packet - Highlight the importance of wave packet 2. <b>Development</b> (30 minutes) a. wave packet b. Mathematical proof c. Numerical problems 3. <b>Exercise</b> (5 minutes) – Use Google forms and Nearpod tool for quiz based on the topic Use Nearpod to collect responses and discuss the answers.
<b>Closure</b>	1. Summarize the Lesson Learning Outcomes and get affirmation from students on these. 2. <b>Lesson Plan No.</b> 52	<b>Course Name: Engineering Physics</b> <b>Topic: Basic of Laser, induced absorption, spontaneous emission, stimulated emission, and Einstein's coefficients</b>	<b>Course No.: BSC-102</b>
------------------------------	---	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: a. articulate the concept of emission, absorption and laser action b. Derivation of Einstein's coefficients
<b>Teaching Aids (if any)</b>	a. Power point presentation b. Chalk & talk c. Use of Google quiz assignment tool for online quiz
<b>Teaching Development</b>	1. <b>Introduction</b> (5 minutes) - Ask questions Why we learn about absorption & emission of light Have any one seen any laser source - Highlight the importance of lasers in communication 2. <b>Development</b> (30 minutes) a. Introduction to absorption & emission b. Basic of Laser c. Induced absorption d. spontaneous emission e. stimulated emission f. Einstein's coefficients  Exercise (5 minutes) – Use Google forms and Nearpod tool for quiz based on the topic Use Nearpod to collect responses and discuss the answers.
<b>Closure</b>	1. Summarize the Lesson Learning Outcomes and get affirmation from students on these. 2. Suggested Reading <a href="https://archive.nptel.ac.in/courses/115/102/115102124/">https://archive.nptel.ac.in/courses/115/102/115102124/</a> 1. <a href="https://www.youtube.com/watch?app=desktop&amp;v=sv1hK_dLVzE">https://www.youtube.com/watch?app=desktop&amp;v=sv1hK_dLVzE</a> Homework Basic problems on optical fibres taught in class Spend 5 minutes to wrap up and consolidate the learnings
<b>Evaluation</b>	1. Reflective Questions (What, Why, Who?). Allow students to answer and discuss. 2. Google Assignment Quiz on lasers & Einstein's coefficient  Spend 5 minutes to evaluate student assimilation of the lesson contents

<b>Lesson Plan No.</b> 53	<b>Course Name: Engineering Physics</b> <b>Topic: Ruby laser construction and working</b>	<b>Course No.: BSC-102</b>
------------------------------	--	----------------------------

<b>Objectives</b>	At the end of the lesson the student shall be able to: <ol style="list-style-type: none"> <li>articulate the concept of light amplification by stimulating emission of radiation (LASER)</li> <li>Construction and working of Ruby laser</li> <li>application of laser in communication, industries and medical sciences</li> </ol>
<b>Teaching Aids (if any)</b>	<ol style="list-style-type: none"> <li>Power point presentation</li> <li>Chalk &amp; talk</li> <li>Use of Google quiz assignment tool for online quiz</li> </ol>
<b>Teaching Development</b>	<ol style="list-style-type: none"> <li><b>Introduction</b> (5 minutes)           <ul style="list-style-type: none"> <li>Ask questions</li> <li>Why we learn about LASER</li> <li>Have any one seen toy LASER source</li> <li>Highlight the importance of Ruby laser as monochromatic, coherent and directional source of laser</li> </ul> </li> <li><b>Development</b> (30 minutes)           <ol style="list-style-type: none"> <li>Introduction to Ruby laser</li> <li>Various parts of Ruby laser               <ul style="list-style-type: none"> <li>-Optical resonator</li> <li>-Optical pumping scheme</li> </ul> </li> <li>Working of ruby laser</li> <li>Energy level diagram</li> </ol> </li> </ol> <p>Exercise (5 minutes) – Use Google forms and Nearpod tool for quiz based on the topic Use Nearpod to collect responses and discuss the answers.</p>
